BEAR CREEK WALKS Saturdays, 9 a.m.

Are you interested in learning about wildlife and wildflowers? Have you always wanted to name and know the beautiful critters and plants that color spring and summer in Colorado? Then make 2013 a year to learn or remember!

Evergreen Nature Center invites you to follow the bloom of spring and summer up the Bear Creek Watershed! Expert naturalists Brad Andres and Chuck Aid still have three more walks to go this summer.

In a span of 25 miles Bear Creek drains from the summit of Mount Evans out to what historically was semi-desert grassland. In the process it passes through a wonderful variety of habitats with their attendant communities of birds.

Join us this summer as we make our way from grassland to tundra enjoying the birds and habitats in which they live.

June 8: Berrian Mountain, meet at Evergreen Lake lot.

July 13: Elk Management Area, meet at Evergreen Lake lot.

Aug. 10: Echo and Summit lakes, meet at Bergen Park-n-Ride.

Register at www.evergreen naturecenter.org.

Summer speaker series at ENC

Normally in the summer we take a break from chapter meetings, but this year we're trying something different.

We will present a series of speakers at Evergreen Nature Center on the first Thursday of the month at 7 p.m. (Due to the Fourth of July falling on Thursday, we'll meet on July 11.)

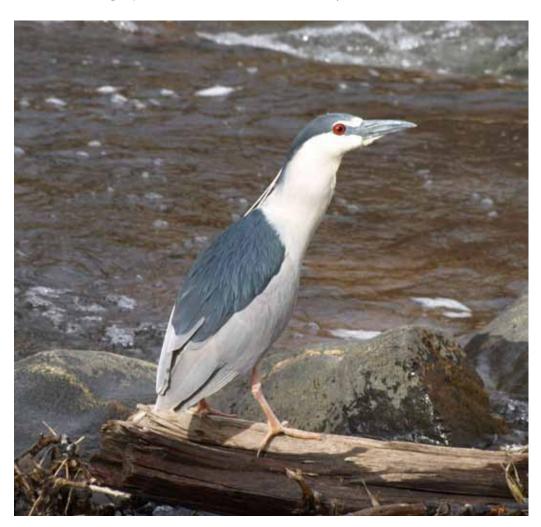

Details of the programs can be found on the event calendar at www.evergreenaudubon.org and in upcoming newsletters.

The summer programs are:

- June 6: *Invasive Weeds*, presented by Betsy Kelson. (Story on page 3.)
- July 11: Sex Lies and Rattlesnakes, presented by Mary Ann Bonnell.
- Aug 1: Denver Mountain Parks Flora and Fauna, presented by Kelly Uhing.

We'll open the Nature Center at 6:30 p.m., so come early for socializing and maybe a bit of birding. For those that need help getting from the Lake House to the Nature Center, we will have a car shuttle available.

- Kathy Madison, Director of Education

Lair o' the Bear Park was a hotbed of birding activity in April and May. This Black-crowned Night Heron posed downstream from the westerly footbridge. The Hiwan ponds were also rife with migrators. For more, see Bird Business on page 4. Photo by Sherman Wing

Meetings first Thursday, 7 p.m., Church of the Hills, 28628 Buffalo Park Road, Evergreen, except January. Meetings in June, July and August are held at Evergreen Nature Center.

PRESIDENT'S MESSAGE BRAD ANDRES

After a rather cool May, our migrant breeding birds are finally returning, wildflowers are appearing and the aspens are leafing out.

Bluebirds and swallows have clutches of eggs in our nest boxes and chicks won't be too far behind. This is the time to really start surveying the Bear Creek Watershed Breeding Bird Atlas sites.

You will see in this issue that we will continue the first Thursday programs/meetings over the summer, but we will hold them at Evergreen Nature Center instead of Church of the Hills (beginning with the June meeting).

Thanks to Kathy Madison for getting an exciting lineup of speakers for the summer. These evening programs are a great complement to the programs Vanessa has scheduled for the Nature Center.

Speaking of the Nature Center, Evergreen Audubon now will have a packet of information going out with the materials the Evergreen Area Chamber of Commerce sends to new residents of the Evergreen area.

Tupper's Team will send out the 2013 Evergreen Nature Center program and our general brochure to new homebuyers in the area.

I welcome all of you to come down and see the changes we have made to Evergreen Nature Center for 2013. Thanks to Evergreen Park and Recreation District, there are some nice new signs to point the way!

Last month, you should have received our Annual Appeal in the mail. Enclosed were some highlights from our past fiscal year and an overview of our budget, which focused primarily on Evergreen Nature Center.

We continue to look for ways to diversify our revenue stream, but the support of Evergreen Audubon members remains a critical component of delivering on the goals of the Nature Center and other Evergreen Audubon programs.

We have completed a three-year strategic plan for the Nature Center, which will be posted on the Evergreen Audubon website. Also, there is a report on the accomplishments of Evergreen Nature Center in 2012.

I hope you will join me in supporting the continued growth of Evergreen Nature Center.

Save the date: EA picnic set for July 27 at Dedisse Park

Don't miss this year's annual Evergreen Audubon Picnic! Mark your calendar for Saturday, July 27. The picnic will begin at 4 p.m. at Dedisse Park.

Audubon will provide the main dish (barbecue) and beverages (3.2 beer and non-alcoholic). We ask everyone else attending to bring a potluck side dish to serve 10.

There will be fabulous entertainment guaranteed to amuse all. We ask when you RSVP, please volunteer to help with setup or cleanup.

The picnic will last until about 7 p.m. To get specific details about the picnic please watch for the article in the July *Dipper*, check our website, or call Janet Warner, 303-674-1636, or Peg Linn, 303-674-2239.

- Peg Linn, Director At Large

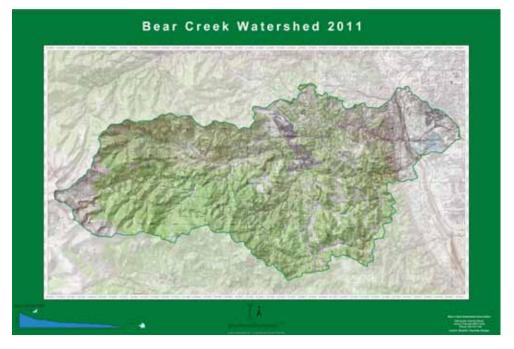

Watershed 101: Learn about the basics at June 1 class

Saturday, June 1, 9 a.m.-noon Evergreen Metro District Office Stagecoach Boulevard

Water is arguably the most powerful

force in nature, but often we take if for granted.

This spring we've enjoyed a wonderful flux in moisture, and Evergreen

Watershed 101 is a chance to get into the lab to learn the basics about Bear Creek Watershed hydrology, wildlife, water rights and treatment. The class will be held Saturday, June 1, from 9 a.m. to noon at the Evergreen Metro District offices on Stagecoach Boulevard. Register at www.evergreennaturecenter.org.

Nature Center wants to celebrate with a special class about watersheds.

When was the last time you thought about your water? Does it come from a well or a reservoir?

Regardless, you are likely part of Bear Creek Watershed.

Do you know where that is? Who are your watershed neighbors? How does water affect our environment?

At Evergreen Nature Center we believe the best way to learn answers to these questions and others is through hands-on experience, so we are very excited to announce a one-time interactive program *all* about watersheds!

On Saturday, June 1, from 9 a.m. to noon, Bear Creek Watershed Association and Evergreen Metro District, the folks that manage Evergreen's public water supply, will offer Watershed 101 at the EMD offices on Stagecoach Boulevard.

The class offers the perfect opportunity to get back into the lab to learn the basics about Bear Creek Watershed hydrology, wildlife, water rights and treatment.

Class size is limited, so register today at www.evergreennaturecenter.org.

- Vanessa Hayes, ENC Director

June chapter meeting at ENC: battling invasive weeds

The Community Weed Awareness Campaign Committee invites you to attend a program on Invasive Weeds on Thursday, June 6, at 7 p.m. at Evergreen Nature Center.

Invasive and noxious weeds have been with us for years, if not decades, and in many cases have had devastating effects on wildlife, ecosystems and our health.

They are not only invading our personal property but also our open spaces, state forests and national parks.

With great spring moisture and a late spring, the weeds will be abundant. (Aren't they always?) Sometime they make you want to just shut the door, but don't.

Let's define our enemy and get out there, enjoy the sun, listen to the birds and yank, mow, weed-whack or apply something to these noxious things. Come see, for example, which weeds got here on purpose (such as Ox-Eye Daisy, Myrtle Spurge, Dame's Rocket and Purple Loosestrife), which thistles are good and bad, and which knapweeds to watch for in our area. Then learn what less-invasive species can be encouraged to take their places.

Bring your weed samples for identification. Perhaps what you thought was a noxious weed is just a great wildflower having a great year.

Evergreen Nature Center

Hours of Operation

April 20–Oct. 12 Sat.–Sun., 10am–4pm

Additional hours May 29-Aug. 30 Wed.-Fri., noon-4pm

If you are not able to attend this program, information about noxious weeds is on display and refreshed monthly at Evergreen Nature Center. Other outreach events are on tap all summer throughout the area.

Cathy Shelton will present at Leadership Evergreen in July and the Weed Committee will have an information booth at King Soopers in Evergreen and Conifer on July 13 (a Pulling for Colorado event).

In August, we hope to have an information booth at Walmart or Natural Grocers. And there still is a possibility that Wake Up and Weed will return. Stay tuned!

Members of the Community Weed Awareness Campaign Committee are Sylvia Robertson, Betsy Kelson, Marilyn Kaussner, Renee Cormier, Bud Weare, Larry White, Pat Carter and Else Van Erp.

- Betsy Kelson

BIRD BUSINESS MARILYN RHODES, ASGD MASTER BIRDER

Wheat Ridge

Tax Day, April 15, took an unexpected turn for the better at Bob Santangelo's Wheat Ridge home. A female **Rose-breasted Grosbeak** made a brief stop at his feeders late in the day during heavy snowfall.

Bear Creek Lake Park

Tim Stechert was surprised to see a single female **Wild Turkey** near the west entrance of Bear Creek Lake Park on Sunday afternoon, April 28, from his bike.

Red Rocks and Bear Creek Canyon The Trading Post at Red Rocks was very active May 2 with White-crowned Sparrows, a Golden-crowned Sparrows, a Song Sparrow, Lincoln's Sparrows, a Green-tailed Towhee and a pair of Lazuli Buntings.

On May 3, I parked in the South Lot, but saw no sign of the **Peregrine Falcons** on their favorite roosts at Ship Rock or Creation Rock.

Suddenly, there was an explosion of **White-throated Swifts** as one peregrine, I assume the male, buzzed the flock.

I prepared to leave as sunset approached, but the ensuing mass of White-throated Swifts—HUNDREDS of White-throated Swifts—that descended between 7 and 7:30 p.m. to roost for the night in giant vertical crevices in the rocks became the highlight of the day.

I tried to count them by taking sequential photos of the flock as it flew in, but they were so high above me, coming in wave after wave, I finally gave up.

A huge portion of them flew into a massive crack on Ship Rock, close to where the peregrines have nested. The rest disappeared into roosting locations behind Ship Rock.

I have watched thousands of **Vaux's Swifts** fly into chimney stacks to roost in northern California, but I have never witnessed this phenomenon at Red Rocks. Guess I just haven't been in the right place at the right time.

Dusk at Evergreen Lake

Karel Buckley reported on happenings

at Evergreen Lake on April 19. She had quite a week.

On April 8, she heard a **Great Horned Owl** hooting as the storm moved in. On the evening of April 16, she saw a **Wilson's Snipe** in the parking lot at a puddle wondering, "Where am I? It's winter here!"

On April 17 at 5:15 p.m., as she left the Nature Center, there was a **Killdeer** in the parking lot wandering around.

At 7:45 p.m. April 18, she saw a snipe fly over her head as she walked her dogs across the parking lot. "How exciting to see its tail and wings in flight!"

She monitored a **Canada Goose** sitting on eggs to the east of the footbridge by Bear Creek Road, faithful to the nest while temperatures plunged to 26 degrees.

Karel also commented about a great new accipiter display Vanessa Hayes has created at Evergreen Nature Center. You can see a Northern Goshawk, Cooper's Hawk and Sharp-shinned Hawk side by side.

Hummers are Back!

We had many reports of returning hummingbirds in April and May. Inga Bren-

nan was first to post on April 20: "Just had my first **Broad-tailed Hummer** on Lookout Mountain at noon!"

Susan Blansett had her first male hummer on April 25 at her feeders in Golden.

My first Broad-tailed made the rounds at my normal feeder spots in Hiwan Hills on April 26 and scolded me for not being ready for him!

The same day Rachel Hutchison had her first-of -eason BTAH in Evergreen Meadows and John Sears posted, "We've had a few dozen reports of hummers even prior to the snows, but they are coming in now at several reports per day."

Larry White chimed in, "Don't forget to put feeders in at night. The hungry bears are out!"

Hummers finally arrived at Susan Harper's on April 27.

The last report came from Scott Mosiman, who had his first hummer at his Bergen Park home on May 4.

Hiwan #6 Reservoira Migrant Trap Spectacle!

The most exciting news this month came from David and Aaron Wald on

Continued on page 5

A Lazuli Bunting was in good company at Red Rocks Trading Post May 2. Also sighted were four kinds of sparrows and a Green-tailed Towhee. Photo by Marilyn Rhodes

BIRD BUSINESS MARILYN RHODES, ASGD MASTER BIRDER

Myrtle Yellow-rumped Warbler at Hiwan #6. Photos by Marilyn Rhodes

Continued from page 4

April 21. The little reservoir in Hiwan Country Club that they pass routinely going to and from home became a migrant trap with the late snow.

Here's what they spotted at Hiwan Reservoir #6 (Interlocken Drive and Spyglass Circle) between 2 and 2:30 p.m. April 20:

Greater Yellowlegs, Lesser Yellowlegs, Willet, Green winged Teal, Mallard, Canada Goose, Ring-necked Duck, Wilson's Phalarope, Franklin's Gull, Great Blue Heron, Red-winged Blackbird, Brewer's Blackbird, Pygmy Nuthatch, Western Bluebird, House Finch, Downy Woodpecker, Northern Flicker, Black-capped Chickadee, American Crow, Kingfisher, Osprey(!), Sharp-shinned Hawk(!), American Bald Eagle(!).

"We've got photos of most," David Wald reported. "I've never seen that little pond so loaded, nor seen so much flying around the area!"

Sherman Wing added to the list the same day: Spotted Sandpiper, Hooded Merganser, Eurasian Collared-Dove, Red-winged Blackbird, Song Sparrow, Common Grackle, American Robin and Western Meadowlark.

He stopped by the pond again on April 22 and saw "about a dozen Butter Butts (**Yellow-rumped Warblers**)."

I stopped by late afternoon April 22

and the pond was still a hoppin'! Some of the neighbors came out on their deck to find out what was going on.

They said they'd had a steady stream of visitors to the reservoir the day before. They had no complaints about the cars or birders, they just wanted to share in the excitement.

Sounds like lots of folks benefited from Dave and Aaron's post on evergreenbirders and got to see a pretty unusual gathering of birds in one spot for Evergreen.

The action continued. On April 25, Brad Andres observed 12 **Willets** at the Hiwan hotspot.

Inga Brennan drove by around 3 p.m. April 25 and reported the pond was still full of the birds previously reported, but added to the list Lesser Scaup, Bufflehead, American Kestrel and American Crows.

Liam Roark arrived at the pond April 28 about 10 a.m. He dipped on shore-birds but got his "first **yellow-rumps** of the season. So not a wasted trip!"

Around 4 p.m. April 30, Shirley Casey reported, "There were about 15 butter butts at Hiwan pond—and 25 or so more at the larger pond at corner of Telemark and Pebble Beach. There were a couple of **Ruby-crowned Kinglets** in the willows at the Hiwan pond near the warblers at the same time."

Later the same day, Shirley found

three **Spotted Sandpipers**, one solitary **White-faced Ibis**, 100 or more **Redwinged Blackbirds** and a **Canada Goose** still sitting on her nest.

I ran into Sherman Wing and later Larry White at the Hiwan ponds the same day. Larry had reported seeing nine **ibis** at the second Hiwan pond, downstream from the fire station, that morning.

One had a yellow band on its right leg but he couldn't make out the numbers. If anyone saw the bird and got the tag number, please report it to Brad Andres.

By the time Sherman and I got there the **ibis** were gone. We did get to see dozens of **Yellow-rumped Warblers** and both subspecies, the **Myrtle** and the **Audubon's**.

Sherman and I also found a lone **Yellow-headed Blackbird**, among a flock of **Red-wings**, singing his heart out. I remember the first time I saw one at Evergreen Lake. Sylvia Brockner told me its call sounded like someone vomiting.

Mark Meremonte and Margaret McDole found a lone **Eared Grebe** at Hiwan Reservoir #6 with a couple of **Mallards**.

Lair o' the Bear

Sherman Wing racked up a slew of birds in Lair o' the Bear in April and May. Shortly after 5 p.m. on April 25, he found a **Black-crowned Night Heron** about

Continued on page 6

BIRD BUSINESS MARILYN RHODES, ASGD MASTER BIRDER

Continued from page 5

50 feet downstream from the westerly footbridge.

On April 27, he saw a **Broadwinged Hawk** near the easterly footbridge. May 2, Sherman snagged a **Swainson's Thrush** near the westerly footbridge.

The morning of May 4, he had a first-of-the-year male **Bullock's Oriole**. Later, he was surprised to find the Broad-winged Hawk again in the very same area where it was originally found—unusual for it to still be there. Could it be a second hawk?

Warren Roske scored the grand prize at the Lair the morning of May 7. Between the end of the parking lot and the west bridge on the creekside trail, he saw his second life **Black-and-white Warbler**.

He had to reread the field guide information to confirm the ID as it behaved like a nuthatch, scrambling among the branches. It is such a distinctive bird, it is unmistakable.

Kathanne Lynch immediately responded to Warren's post on evergreenbirders with, "I saw my first one with Bill Brockner at Evergreen Lake's Dawn Chorus.

"Bill told me they are seen in Evergreen only between May 2 and 10. I just about fell out of my chair when he gave me those precise dates."

Soda Creek

JoAnn and Bill Hackos reported a **Clark's Grebe** on the private pond on Alta Vista Drive in Soda Creek late afternoon April 25. Susan Harper and Sherman Wing observed it along with an **Eared Grebe** the next day.

Both grebes were still at the pond when I drove by May 2, along with four **Wilson's Phalaropes**.

Sherry Walker saw the **Eared Grebe** and **Clark's Grebe** at the Soda Creek pond the morning of May 9, along with a **White-faced Ibis**.

Yard Birds

Sherman Wing reported a first-of-theyear **Common Grackle** at his feeder in Indian Hills on April 21. An **Evening**

A lone Clark's Grebe, left, and a single Eared Grebe were spotted at the Soda Creek pond on May 9. Photo by Marilyn Rhodes

Grosbeak made an appearance at David Walker's Indian Hills feeder on April 29 and a **Red-breasted Nuthatch** came to his feeder May 7.

April 27 Susan Harper posted, "Just had a sharpie (**Sharp-shinned Hawk**) stop on a branch above my feeding station for a full minute."

On April 30, Susan reported, "About eight Evening Grosbeaks hanging around the past couple days at my feeder in Wilmot Woods. Pine Siskins have returned to the yard, one Chipping Sparrow and Red-naped Sapsuckers are exploring our narrow-leaf cottonwood."

Susan relayed additional sightings on May 8. "Today I saw the first returning **White-crowned Sparrow** to the yard.

"Still have a handful of **Evening Grosbeaks** hanging around–absolutely gorgeous colors!"

Liam Roark had five **Evening Grosbeaks** in his yard between Evergreen and Conifer on April 28.

On May 2 a dozen or more **Red Crossbills**, joined by a few **Cassin's Finches**, descended on my Hiwan Hills feeders and they were hungry!

On May 2, Scott Mosiman reported a **White-crowned Sparrow** at his home feeder in Bergen Park.

Out and About

Western Colorado

Sherman Wing reported large flocks of American Robins, Horned Larks and Mountain Bluebirds in western Colorado on April 18. Also many American Kestrels in bright breeding plumage.

He saw five **Ospreys** calling out as they danced in the sky but was unsure as to whether they were defending territory or doing a courtship display.

He also got to see a nice **Sage Thrasher** at Escalante-Dominguez Canyon.

Nebraska and South Dakota

JoAnn and Bill Hackos posted from Pierre, S. D., on May 2: "The big event today—25-plus **Common Loons** on the Missouri in full breeding plumage. We have never seen so many loons in one place." You can follow their travels on their blog at pygmynutchatches.com.

Southeast Arizona

Mark Meremonte and Margaret Mc-Dole posted reports from southeast Arizona from April 22 through 30.

For a list of birds they saw, go to www.evergreenaudubon.org and click on Local Sightings to subscribe to evergreenbirders.org and read the archives.

FIELD TRIPS AND PROGRAMS

Watershed 101 Saturday, June 1, 9 a.m.-noon Evergreen Metro District Office, Board Room

Get back in the lab to learn the basics

of Bear Creek Watershed-hydrology, wildlife, water rights and treatment-in this hands-on class for adults and teens. Special offering by Bear Creek Watershed Association and Evergreen Metro District.

NATURE CENTER KIDS PROGRAMS

Call Evergreen Nature Center, 303-330-0489, to register.

Wednesday Wild Ones: Calf Time! June 5, 10–11 a.m. Evergreen Nature Center

It's time to welcome elk babies to Evergreen! Come and play-to-learn about these big, beautiful beasts and their nurturing moms.

Ages 2–5 with adult.

Bear Creek Dippers: Rock Hounds Saturday, June 29, 10 a.m.—noon Dedisse Park

Calling all rock hounds! Bear Creek Dippers will explore the rock cycle.

Hunt for rocks with a geologist, make your own sedimentary rock to take home, and learn about fossils, plate tectonics and more.

Ages 6-10 with adult.

It's time for little elk to appear in Evergreen. Your little ones can learn about cows and calves, as well as bulls, at the Wednesday Wild Ones program at Evergreen Nature Center on June 5. Photo by Sherman Wing

Dawn Chorus celebrates spring birds

About 30 Evergreen Audubon members met at 6 a.m. May 5 at Evergreen Nature Center to celebrate the Dawn Chorus of our returning migratory birds.

Compared to some years, the weather was very cooperative, although spring migration was a bit delayed this year.

Chorusers, however, were able to

locate 45 species by 10 a.m. Highlights included a bright male Cinnamon Teal, two Willets, a Green-tailed Towhee and a total of six sparrow species.

Thanks to ENC Executive Director Vanessa Hayes for organizing the event and to all who participated.

- Brad Andres, President

Evergreen Audubon Presents: Invasive Weeds Thursday, June 6, 7 p.m. Free Event

Come learn what plants are good, which are bad and the best native plants to use for our mountain ecosystem.

Presented by Betsy Kelson, president of the Evergreen Community Weed Awareness Campaign.

Bear Creek Nature Walk: Berrian Mountain Saturday, June 8, 9 a.m. Meet at Evergreen Lake parking lot. In a span of 25 miles Bear Creek drains from the summit of Mount Evans out to what historically was semi-desert

In the process it passes through a wonderful variety of habitats with their attendant communities of birds.

grassland.

This is the second of four monthly walks this summer, during which we will make our way from grassland to tundra enjoying the birds and the habitats in which they live.

Stargazing at Evergreen Lake Saturday, June 8, 8:30 p.m. All ages

Bring a blanket or camp chairs. Join amateur astronomer Pam Little for a tour of the night sky. Meet on the west side of the lake parking lot.

How to Identify Wildflowers Saturday, June 22, 12:30–3 p.m. Evergreen Lake

Discover the beautiful wildflowers that color the mountains of Colorado.

Evergreen Audubon naturalist Lynne Price will lead this outdoor workshop at Evergreen Lake.

Please bring a hand lens, any field books you have and a specimen for identification.

Night Boating and Nature Exploring Saturday, June 29, 7–10 p.m. Free Event

Stop by ENC during extended boat rental nights to pick up your family scavenger hunt and begin an evening outdoor adventure.

CALENDAR OF EVENTS

June 1	Watershed 101	9 am-noon	Evergreen Metro District
June 4	Family Volunteer Training	6-8 pm	Nature Center
June 5	Wednesday Wild Ones	10-11 am	Nature Center
June 6	Chapter Meeting	7 pm	Nature Center
June 8	Bear Creek Nature Walk	9 am	Berrian Mountain
June 8	Stargazing	8:30 pm	Evergreen Lake House lawn
June 10	Newsletter deadline	5 pm	
June 22	How to Identify Wildflowers	12:30-3 pm	Evergreen Lake
June 29	Bear Creek Dippers	10 am-noon	Dedisse Park
June 29	Night Boating/Exploring	7–10 pm	Evergreen Lake/ENC
July 27	EA Annual Picnic	4 pm	Dedisse Park
