DAWN CHORUS

International Dawn Chorus Day is the worldwide celebration of nature's daily miracle. All around the globe on Sunday, May 5, people will get up early to greet the rising sun and witness the awakening of another day.

Join us on the boardwalk near the Lake House on Evergreen Lake to view the sunrise over the hills, listen to the Red-winged Blackbirds sing their morning songs, and watch the ducks and muskrats start another busy day on the lake.

Birders will gather at Evergreen Nature Center as the sun rises.

There will be coffee available at the ENC starting at 6 a.m. and breakfast will be served at 8 a.m. Birders will take off from the Nature Center and plan on birding Evergreen Lake. We will post a tally of the birds observed for all to enjoy throughout the day.

Contact Vanessa Hayes if you'd like to bring a breakfast item.

Live ferret will make appearance at May 2 EA chapter meeting

Mr. Brightside, a traveling black-footed ferret, will accompany Kimberly Tamkun of the National Black-footed Ferret Conservation Center in northern Colorado to the May 2 chapter meeting.

Kimberly will delve into the natural history, rediscovery and future of this endangered species.

From the ferret center's website, www.blackfootedferret.org, I learned a lot about the black-footed ferret, including the fact that it has ties to John James Audubon.

In 1851, Audubon and the Rev. John Bachmann were the first to officially describe the species from a specimen found near the Platte River. The ferrets were so elusive to humans, that shortly after Audubon's description, a controversy brewed over their true existence. No one reported another ferret for 26 years.

However, scientists knew they existed; skeletons of ferrets have been found in prehistoric Indian camps and it's been documented that many tribes, including the Sioux, Navajo, Cheyenne, Blackfeet and Crow, used black-footed ferret body parts for medicinal purposes and ceremo-

A sleepy black-footed ferret kit. Photo by Kimberly Tamkun

nial adornments. In the mid-1800s, fur companies occasionally listed black-footed ferrets in their logs.

With the continued settlement of the North American prairies, the ferret's food source and landscape were dramatically

Connect with Your Lake, Your Chance: Volunteer at Evergreen Nature Center

Do you love nature, sharing and learning? Then become an Evergreen Nature Center individual, couple or family (ages 10-plus) volunteer Visitor Assistant today!

Visitor Assistants are the fuel that keeps Evergreen Nature Center running and we are always looking for more friendly folks to fill the role.

We have revamped the Visitor Assistant position to provide more opportunities for training, learning and rewards for dedication.

Volunteers who fulfill their 12-hour

service requirement also enjoy free ENC programs.

Join us at these upcoming events and classes to learn more!

Volunteer Mentor Training Tuesday, April 30, 6-8pm, ENC

Calling all seasoned ENC volunteers: It's time to reenergize and refresh your knowledge about ENC exhibits and logistics. We're looking for returning volunteers who are willing to help train new recruits!

Meetings first Thursday, 7 p.m., Church of the Hills, 28628 Buffalo Park Road, Evergreen, except January. Meetings in June, July and August are held at Evergreen Nature Center.

PRESIDENT'S MESSAGE BRAD ANDRES

Last month I filed a form with the Colorado Secretary of State for The Evergreen Naturalists Audubon Society Inc. to “Do Business As (DBA)” Evergreen Audubon. Why do this?

For the last several years, the board has talked about increasing the branding of our organization to market ourselves to new members and organizations in our mountain communities. To many newcomers, TENAS was thought of as a game played with two racquets and a ball and conjured up images of the big white bubbles across from Elk Meadow.

The name “Audubon” immediately personifies a group dedicated to the conservation of and education about natural resources. There is no question that long-time residents of our mountain communities recognize that TENAS roots are grounded in the same philosophy. To honor that heritage, our legal name remains the same.

The current program offerings at our general meetings and through Evergreen Nature Center reach a full range of natural history topics envisioned as the realm of Evergreen Naturalists founders—from abiotic stargazing to the high biotic organizational forms of birds and mammals.

We are still tackling conservation issues, from tracking and garnering support for state conservation legislation to launching a “respectful recreation” initiative around Evergreen Lake.

We continue to participate with other organizations, such as the Evergreen and Conifer chambers of commerce, to keep us visible as an active member of our mountain communities. Reaching out to more school groups with our educational programs will help build a future society of conservation-minded citizens.

So, although we may use a shortened name, our mission has stayed the same and our goals have broadened.

The spring offers a time of renewing your contributions to our volunteer programs at Evergreen Nature Center, in various bird-monitoring projects, or educating about and eradicating weeds. You will soon be receiving our annual appeal, and I hope I can count on your support for pursuing our education and conservation mission!

I look forward to seeing you at our 5th birthday party for Evergreen Nature Center, at the Dawn Chorus, in Elk Meadow checking nest boxes, or at some other spring event. Note that we will be holding general meetings at the Nature Center throughout the summer.

Volunteers help out on “Nesting Day” at Evergreen Nature Center April 6. The ENC opened for the 2013 season on Earth Day, April 20. Photo by Lisa Wald

Evergreen Nature Center gets a gallery makeover

Evergreen Nature Center is thrilled to announce the complete installation of Philip Newsom's Bear Creek Watershed mural series!

The beautiful five-part collection demands visitor and community attention, masterfully emphasizing the connectivity created by flowing water as well as Evergreen Lake's context within our local watershed.

Naturalists and art are as inherently connected as Evergreen and ponderosas.

Likewise, it's difficult to imagine the

Pet Portraits: Llama, by Philip Newsom

A beautiful collection of murals by Philip Newsom now graces the walls of Evergreen Nature Center. Photo by Vanessa Hayes

mountain community divorced from its talented artists of all medias, so the impetus behind the mural project is more reinforcement of a long-standing tradition, than the desire for novelty.

That being said, it's wonderful to see the ENC colored in newness.

As with all Evergreen Audubon efforts, this project represents the loving generosity of many. We must personally thank Carmon Slater for enticing Philip to share his gift, then handcrafting each

canvas and frame, Marge Petersen for paying for all framing material and Brad Andres, Steve Garman, Chuck Aid and Tom Thayer for rising to the challenge of hanging each painting

The Jefferson County Board of Commissioners also deserves our appreciation for awarding \$1,000 toward the mural series as part of our 2012 and 2013 Conservation Trust Fund Local Grant.

As for Philip, the grateful words of one are nothing short of paltry, so as a sign of true recognition I encourage each Evergreen Audubon supporter to discover, promote and of course buy Philip's work.

If you have not already, please go to Philip's website, www.newsomart.com, and explore the vast array, from Pet Portraits to my personal favorite, *Mystery Forms (First Appearance of Strange Idea No. 3)*.

- Vanessa Hayes, ENC director

Volunteer at Nature Center: 'Your Lake, Your Chance'

Continued from page 1

ENC Volunteers Love to Learn Hour Friday, May 10, 11am-noon

Throughout the summer, ENC will be offering weekday and weekend opportunities for casual learning in a social atmosphere. Each month we will concentrate on a particular exhibit and Evergreen's currently present wildlife and plants.

CPR Training Wednesday, May 15, 5-9pm at Evergreen Fire and Rescue

CPR is an essential life skill that could help save the life of someone you love. In 2013 Evergreen Public Access Defibrillation is offering free and discounted CPR classes to citizens that live or work

in Evergreen. Auditing the course is free and certification is an economical \$20. Sign up at www.evergreenfirerescue.com.

Evergreen Nature Center 5th Birthday Party and Volunteer Open House Saturday, May 18, 5-8pm, ENC

Evergreen Nature Center is showing off, and you are personally invited to help celebrate!

This is the perfect opportunity to find your place in the future of a growing community asset, and to meet new nature-loving Evergreen Audubon friends over refreshments.

Our seasoned volunteers and board members will be on hand to highlight the tremendous growth of ENC over the last five years and answer your questions.

New Visitor Assistant Training Thursday, May 30, 6-8pm, ENC

Whether you signed up in the last month or last five years and would like to get involved again, this training is for you!

Training will include an overview of Visitor Assistant best practices, procedures and new exhibit information.

Sign up on the Volunteer Information Center link on evergreenaudubon.org or email encdirector@evergreenaudubon.org.

Family Volunteer Training Tuesday, June 4, 6-8pm

Learn how your family (ages 10-plus) can grow together by serving the mountain community. See the Family Volunteerism article for more information.

- Vanessa Hayes, ENC Director

Mr. Brightside will be special guest at May 2 meeting

Continued from page 1

altered, causing its rapid decline. By the late 1950s, the black-footed ferret was thought by many to be extinct.

In 1964, a remarkable discovery was made: A small population of black-footed ferrets was found in Mellette County, S.D. Biologists studied these ferrets, and after a few years noticed the population was starting to decline.

They captured nine ferrets and took them into captivity in the hopes of starting a captive breeding program. The wild population died out in 1974. Unfortunately, captive breeding efforts were unsuccessful in producing surviving kits and the last ferret died in captivity in 1979.

The black-footed ferret was now considered extinct, though back in 1967, it was listed as “endangered” on the first-ever Endangered Species List. (Note the Endangered Species Act wasn’t passed until 1973.)

In 1981, in an amazing turn of events, black-footed ferrets were rediscovered near Meeteetse, Wyo. And thus, the Black-Footed Ferret Recovery Program was born at the U.S. Fish and Wildlife Service.

The National Black-footed Ferret Conservation Center in Wellington, Colo., is operated by the USFWS. It houses 60% to 70% of all captive black-footed ferrets. They released 228 black-footed ferrets into the wild in 2012.

Black-footed ferrets once ranged throughout the Great Plains, from southern Canada to northern Mexico—wherever prairie dog colonies thrived. Today, black-footed ferrets have been reintro-

Black-foot ferrets will be the subject of the May 2 chapter meeting. Photo by Kimberly Tamkun

duced at certain locations within their historic range.

They eat, sleep and raise their young in prairie dog burrows, and cannot survive for extended periods outside of a prairie dog colony. They spend about 90 percent of their time underground.

The black-footed ferret is considered a flagship species for the North American prairie. That means if we save the ferret we save more than 130 unique plants and animals that depend on this ecosystem.

Kimberly has been with the National Black-footed Ferret Conservation Center since 2009, first as a volunteer then as an administrative and education staff

member. She is also the Black-footed Ferret coordinator at the Fort Collins Museum of Discovery (www.fcmod.org).

At the museum, she oversees the care of two live ferrets on display in a state-of-the-art prairie diorama. Prior to working for the USFWS, Kimberly began her work with black-footed ferrets at the city of Fort Collins Natural Areas Department in prairie education.

The May chapter meeting will be held Thursday, May 2, at 7 p.m. at the Church of the Hills, 28628 Buffalo Park Road (across from Evergreen Library) in the downstairs Fellowship Hall. Everyone is welcome.

- Kathy Madison, Director of Education

Nature Center offers chance for family volunteerism

Are you and your children 1 and over interested in nature? Do you enjoy family hikes and outdoor adventures? If so, Evergreen Nature Center has a great opportunity for your family to grow together.

Become ENC Family Visitor Assistants and learn and share together. Family VAs welcome guests to the Nature Center while enjoying a few hours at Evergreen Lake. Shifts are the same as

regular Visitor Assistants (1 to 4 p.m. Wednesday through Friday and 10 a.m. to 1 p.m. and 1 to 4 p.m. Saturday and Sunday), but family volunteers offer a dynamic visitor experience for a greater age range of guests.

In other words, we believe that an 11-year-old nature enthusiast is more likely to reach children than an adult, and both young volunteers and guests will have fun in the process.

Volunteerism is a family value that can develop into a lifelong pattern of reaching out to help others.

If Evergreen Nature Center sounds like an enticing place to learn to serve community together, head to the Evergreen Audubon volunteer page to apply or contact Vanessa Hayes at encdirector@evergreenaudubon.org.

We hope to see you together soon.

- Vanessa Hayes, ENC Director

Yard Birds

From Susan Harper, April 7, "Pair of **Red Crossbills** has shown up occasionally throughout winter . . . pair of **Cassin's Finches** last week.

Susan also reported that a male **Red-naped Sapsucker** returned on April 5.

She was shocked to see one **Wild Turkey** perched on her next-door neighbor's deck railing April 6 at 7:30 a.m.

The lone turkey hen is really getting around. She's visited Peggy Durham's home and mine and has been seen regularly in Hiwan Hills this year.

Inga Brennan posted April 7, "There was a **Wild Turkey** hen two weeks ago in the parking lot at Creekside Cellars. At one point it tried to cross Main Street and stopped traffic!"

The same day Mark Meremonte shared a surprising photo of two turkeys in the Upper Bear Creek/Witter Gulch area. He said the turkeys stop cars in this area to pick insects out of the car grills!

Besides the one shown here, another of Mark's photos is in the Photo Gallery on the EA website.

Evergreen Bluebirds are Back!

JoAnn and Bill Hackos saw two **Mountain Bluebirds** near Soda Creek pond on March 15.

On March 17, Inga Brennan had a male **Western Bluebird** checking out a nest box and Kathanne Lynch had her first-of-year **Mountain Bluebirds** at Genesee.

On March 18, Kit Darrow saw her first bluebird of the year in Alderfer/Three Sisters Park.

Evergreen Lake

On March 29, Joyce Trygstad Nelson and Laura Nelson posted that they saw a pair of **Red-tailed Hawks over Evergreen Lake**, probably courting. "It was amazing to watch!"

The morning of April 3, Karel Buckley saw several hundred **Sandhill Cranes** kettling above the Evergreen Lake/Safeway area. "Thrilling!" she said.

Karel and Susan Harper both reported hearing a **Great Horned Owl**

Marilyn Rhodes photographed this Red Crossbill on April 16 at her home.

Wild Turkeys stop a vehicle to pick insects out of the grills Photo by Mark Meremonte

To report local sightings or read the archives, go to evergreenaudubon.org and click on Local Sightings.

Also, the Photo Gallery on the website displays photos of many sightings referenced in Bird Business.

hooting at Evergreen Lake in early April.

Red Rocks–Falcons and Sparrows

On March 18 Mike Henwood reported, "Visited Red Rocks this morning. Shortly after 7 saw the male **Prairie (Falcon)** fly from last year's eyrie across to Frog Rock, where the female was perched and calling."

A female **Raven** was on the nest at the west end of Creation Rock and the male was hanging around doing some calling.

Mike found the female on the **Golden Eagle** nest below Idledale.

He also stopped at Red Rocks March 23. "To my surprise, a **Slate-colored Fox Sparrow** appeared underneath the platform feeder between 6:30 and 6:45 p.m."

Mike reported from Red Rocks again on Mar 29. "Both the **Golden-crowned Sparrow** and lone adult **White-crowned Sparrow** (Gambel's)

appeared with all the other regulars."

He was happy to report that the pair of **Peregrine Falcons** had returned to Ship Rock. "The pair was flying around Ship Rock and Creation Rock calling and harassing the male **Raven**."

On March 31, Bob Santangelo made an interesting observation: "Went to the rocks yesterday and got good looks of one of the **Peregrines**—unusual in that this bird had dark gray barring on the belly and was very white on the bib and breast, not the usual reddish barring across the front."

He speculated it is a different subspecies this year.

Mike Henwood is taking on the task of documenting the falcon activity and descriptions of both birds.

"I'm putting together detailed descriptions for the male and female falcons at Red Rocks," he said.

"We have detailed descriptions for

Continued on page 6

Continued from page 5

the male and female **Prairie Falcons**. Haven't had a chance to study the **Peregrine Falcons** in detail yet.

"Good photos are very helpful and more reliable than observations made just with binoculars or a scope, so any photos detailing field marks are most welcome."

Mike also would like to be able to distinguish between the male and female **Red-tailed Hawk** pairs at Bear Creek Lake Park.

If you want to share your photos and/or observation with Mike, please email him at hawken@aol.com.

Sherman Wing reported some additional species at Red Rocks April 3: "along Red Rocks Trail Road—**Say's Phoebe, Mountain Bluebird, Western Meadowlark.**"

Chuck Aid saw the **Slate-colored Fox Sparrow** at the Red Rocks Trading Post on April 7.

Finally, a Red Rocks moment reminiscent of Art Linkletter's "Kids Say the Darndest Things."

On April 3, Bob Santangelo took the granddaughters Abigail and Gabriella to Red Rocks.

They got great scope views of a **Peregrine** on Ship Rock, **White-breasted Nuthatch, Black-capped Chickadees, juncos** at the feeders and a **Scrub Jay**.

On the way out Bob stopped the car to point out an oriole nest that was right next to the road and in the open.

At home, Abby described the "mem-oriole nest" and Bob thought how appropriate the term was seeing that this was a last year's nest, never to be used again.

HawkWatch—Dinosaur Ridge

The Rocky Mountain Bird Observatory coordinates the Citizen Science monitoring at Dinosaur Ridge from March 1 through mid-May.

Kathanne Lynch said people can visit any day through mid-May, as volunteers are there from 9 or 10 a.m. to 3 or 4 p.m.

The site is a small stone platform southeast of the power lines, and is accessed from the Stegosaurus parking lot at I-70 Exit 259 and Highway 93, as it heads down to Morrison.

Out and About

Colorado Springs

While searching for **Bohemian Waxwings** in Colorado Springs on March 10, six other birders and I witnessed a rare spectacle on Barrett Road, near Turkey Creek Recreation Area.

A flock of approximately 600 **Mountain Bluebirds** and a smattering of **Western Bluebirds** perched on conifers in a residential neighborhood, like blue Christmas tree ornaments, suddenly took flight.

Boulder

I ventured to Boulder on March 12 in search of the elusive **Bohemian Waxwings**. Alas, I had to settle for a dozen **Trumpeter Swans** at Walden Ponds.

I was back in Boulder March 27 and saw a pair of **Eastern Bluebirds** at Twin Lakes in the Gunbarrel area.

To distinguish **Eastern Bluebirds** from **Western Bluebirds**, look at their shoulders, neck, back and belly.

Western Bluebirds have a blue throat and belly, chesnut-colored shoulders and often chesnut backs; **Eastern Bluebirds** have an orange throat and sides of neck, a white belly, blue shoulders and backs.

Loveland

Finally! I got to see not one, but hundreds, of **Bohemian Waxwings** at Simpson's Ponds SWA in Loveland on March 27. Lifer!! Just before I arrived, birders saw 600 to 800 of them take to the air.

Early in March, Dee Sacks, Karel Buckley and I observed **Short-eared Owls** near Latham Reservoir.

Early in April, just about a mile from the location of the waxwings in Loveland, I observed a **Long-eared Owl**.

Morrison

On April 3, Dan Frelka observed a "very aggressive" male **Blue Grouse**, a first for him, on Mount Lindo (where the Olinger Cross is located).

Prospect Park, Wheat Ridge

Mike Foster reported April 3, "This past Sunday—Easter!—I had 36 species at Prospect Park, including 15 duck species,

Long-eared Owl. Photo by Marilyn Rhodes

notably **Ruddy Ducks**, a **Cinnamon Teal** and all three mergansers."

Conifer

On April 3, John Sears, owner of Evergreen Wild Bird Store, said a "half-dozen female **Evening Grosbeaks** and a few **Cassin's Finch** males showed up today along with one **Black-capped Chickadee.**"

California

On March 18, Barbara Jean Gard responded to the many bluebird posts on evergreenbirders, "I do not have **Mountain Bluebirds** here in central California.

"However, enjoying **White-tailed Kites, Pelagic** and **Brandt's cormorants** with their glistening blue throats, **Black Oystercatchers**, pelicans, etc."

JoAnn and Bill Hackos were also in California the last half of March. Check out their blog postings at www.pygmy-nuthatches.com.

South Carolina

John Sears posted on March 20, "Just back from a long weekend in Charleston, S.C., where the birding was great.

Several Eastern warbler species migrated through. They saw one **American Redstart** along with small flocks of

Continued on page 7

Early Bear Creek Atlas report: Lair o' the Bear

March 31 was the first trip Sherman Wing's Bear Creek Atlas group made to Lair o' the Bear Park.

"It's the last day in March, and early in the spring; we weren't sure how many species and what type of activity there might be today," Sherman said.

"There's been discussion and reports about global warming and the effects it might have on the birds.

"It is suggested the birds might start breeding earlier, go farther north in latitude and higher in elevation to find proper breeding habitat. So here's what we found today.

The Head Scratcher

"We saw six Ravens soaring low above us; we agreed that this was unusual.

"These birds trailed each other, doubled back and then two birds locked talons and drifted together for several seconds, obviously a courtship dance.

"We listened and compared the call of the Common Raven with the call of the Chihuahuan Raven. It was a split decision; two of us thought the call wasn't so gravelly but we're going with Common Raven.

Other Probable Breeders

1. We watched a male Northern Flicker fanning out his orange tail trying to attract the female, who was a couple of feet away.

2. There were lots of Black-capped Chickadees singing along the stream, foraging in the alders, beautiful songs.

3. Same can be said about the Song Sparrows and the American Robins,

Citizen Scientists Larry White, left, and Sherman Wing participate in the April 6 Lair o' the Bear count for the Bear Creek Atlas Team. If you'd like to join the Lair o' the Bear BCA team, call Susan Harper, 303-478-4847. Photo by Susan Harper

singing in the shrubs along the creek.

4. Lastly, we observed a pair of American Dippers foraging near the fishing pier. The two got close and then we saw the male offering food to the female.

5. First of the Year—Turkey Vulture and Belted Kingfisher.

"We had a total of 18 species, with six probable breeders."

On April 6, the team was delighted to confirm its first breeding bird of this season—an American Dipper.

They also added three new birds to this year's count, bringing the total to 21 species at the site.

A pair of American Dippers were very active, building their nest under the eastern foot bridge. At one point another Dipper arrived and the pair defended their territory and escorted the bird out of the area.

Larry White spotted an adult Golden Eagle and Bobby Holmes saw a Northern Goshawk.

- Marilyn Rhodes

BIRD BUSINESS MARILYN RHODES, ASGD MASTER BIRDER

Continued from page 6

wintering **Cedar Waxwings, Eastern Bluebirds, Brown-headed Nuthatches** and a **Brown Thrasher**.

Texas

Dave Walker of Indian Hills spent some time in March volunteering at Balcones Canyonlands NWR in the Texas hill country.

He saw his first **Golden-cheeked Warbler**, an endangered species.

He spent January and February as a volunteer bird tour guide at Padre Island National Seashore, which produced several lifers.

He saw a nesting pair of **White-tailed Hawks** and a **Reddish Egret** reliably performing its comedic frenetic feeding behavior.

Laguna Madre, the bay side, has thousands of wintering **Redhead Ducks**. He saw **Peregrine and Prairie falcons** and, on three occasions, **Aplo-mado Falcons**.

He never tired of watching **Crested Caracaras** and was interested to see **Long-billed Curlews** on the Gulf Beach, the interior grasslands, and on the Laguna Madre Shore.

CALENDAR OF EVENTS

May 1	Wednesday Wild Ones	10–11 am	Nature Center
May 2	Chapter Meeting	7 pm	Church of the Hills
May 4	Stargazing	8:30–9:45 pm	Evergreen Lake House lawn
